

KinderTEK

Get Tech Ready for KinderTEK! Connectivity

Get the technology ready and print student passcode reminders!

To be successful, test out your technology and prepare your students!

This module helps you do just that. You can complete the tasks in this module when you are ready for your next step.

Must Do's before you start implementing:

1. **WiFi check** - all iPads must have a reliable connection to the internet.
2. **App download** - the KinderTEK app will need to be downloaded onto your iPads.
3. **Log in** -the teacher account will need to be logged in to prior to the student log ins.

Connectivity: WiFi Check (REQUIRED)

The KinderTEK app is designed to work while on an internet connection. Confirm school WiFi connectivity on ALL your iPads.

Go to Settings

- Touch WiFi
- Choose your most stable school WiFi connection that will not have security resets
- Enter your school WiFi credentials/password
- Were you successful? Look for the wifi symbol in top left of home screen AND Safari app should successfully connect to any website you choose.

KinderTEK App Download (REQUIRED)

Is the KinderTEK app downloaded onto all of your iPads?

Connectivity: Activate KinderTEK and student rosters (REQUIRED)

On EACH iPad, log into KinderTEK's *Manage Users* area with your teacher login information

User Name: **full school email**

PW: **first name, first letter capitalized**

This only needs to be done once at the beginning of the year for each iPad. It will let the iPad know whose class will be using KinderTEK and will integrate all the student roster information we've set up for you. You need WiFi for this process.
